### **DETAILED ACTION**

# Status of Application

- 1. The response filed November 4, 2008 has been received, entered and carefully considered. The response affects the instant application accordingly:
  - Claim 1 has been amended.
  - b. Claims 2 and 4 have been cancelled.
- 2. Claims 1 and 3 are pending in the case.
- 3. Claim 1 is present for examination.
- 4. The text of those sections of title 35.U.S. Code not included in this action can be found in the prior Office action.
- 5. All grounds not addressed in the action are withdrawn or moot.
- 6. New grounds of rejection are set forth in the current office action.

#### **New Grounds of Rejection**

7. Due to the amendment of the claims the new grounds of rejection are applied:

## Claim Rejections - 35 USC § 112

8. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

9. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in

Art Unit: 1612

the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention.

The claimed invention is directed to the use of any depsipeptide that has any degree of histone deacetylase inhibition for the treatment of primary open angle glaucoma. The method requires the use of any depsipeptide with any degree of histone deacetylase inhibitory activity where the specification does not indicate any examples or description of what amount of inhibition or parameters are needed to be met, or which possible depsipeptides were known to the applicant.

First, the claims and description define the depsipeptides by what it *does* and not what it *is*. Second, it describes the depsipeptides through a measurement of action on histone deacetylase with no disclosure as to requisite determinations such as the degree of inhibition. This does not adequately describe which depsipeptides are addressed as it is inadequate to describe a product to be administered through the function of another mechanism, which can be affected by many conditions like temperature (e.g. fever) not related to the invention. Additionally, the art as taught by Ahn (U.S. Pat Pub. 2008/0318844-paragraph 79) teaches that there are still screening processes currently evaluating possible depsipeptides with histone deacetylase inhibitory activity. As a result, the fact pattern indicates that the artisan was not in possession of the depsipeptides for the claimed method of use.

10. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1612

11. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 contains the name MS-275, whereby the name is a lab designation which is analogous to a tradename and when used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A propriety lab name designation, trademark, or trade name is used to identify a source of goods, and not the goods themselves. Thus, a lab name designation, trademark, or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe several of the compounds in the claim rather than a chemical name (e.g. IUPAC) or a chemical structure, or a known drug name (e.g. tunicamycin) and, accordingly, the identification/description is indefinite.

# Response to Arguments

- 12. Applicant's arguments to the art rejections with respect to claim1 have been considered but are moot in view of the new grounds of rejection.
- 13. Terminal disclaimers have been filed and approved for the provisional rejections for the copending applications. The provisional rejections are withdrawn.

Art Unit: 1612

#### Conclusion

14. Claim 1 is rejected.

15. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GIGI HUANG whose telephone number is (571)272-9073. The examiner can normally be reached on Monday-Thursday 8:30AM-6:00PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fredrick Krass can be reached on 571-272-0580. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
